EM-MP150S

Fanless Embedded PC

Intel Core i5 7200U

EM-MP150S is a fanless embedded industrial PC solution, which adopts Intel Low-Power Embedded i5 7200u processor, supports 1 4GB DDR4L memory, VGA + HDMI synchronous asynchronous dual screen display, 4 LAN, 4 COM, 128GB SSD storage, wide voltage 9 ~ 36V input, compact, fanless, high performance, die-casting aluminum alloy body, dust-proof function, suitable for harsh industrial environment.

Fanless designed industrial computer, there is no need to worry about moving part failures. The system passively dissipates heat from processors and other vital computer components. Fanless systems can be fully enclosed, keeping dust and debris out of the system. A fanless computer is extremely quiet, making it ideal for situations such as the main computer monitoring and control of Industrial Automation, Mechanics Solution, CNC Equipment, Textile Equipment, Intelligent power solution, Food Traceability and so on.

EM-MP150S is compatible with Windows 7/10, Linux OS and embedded OS, also can support customized OS which is based on above systems and install industrial automation configuration software to comprise powerful HMI.
